90-Day Campaign Roadmap

AI

01

FOUNDATION

DAYS 1-14

- Audit backlink profile
- Identify 20-30 target partners
- Create discount codes per tier
- Personalise top 10 outreach

02

OUTREACH

DAYS 15-45

- Send to Tier A partners first
- Follow up after 5-7 days
- Begin Tier B in parallel
- Track in spreadsheet

03

EXECUTION

DAYS 46-75

- Negotiate link placements
- Provide assets to partners
- Monitor new backlinks
- Begin Tier C for volume

04

OPTIMISE

DAYS 76-90

- Review links, DA, referral traffic
- Share data with partners
- Identify top categories
- Document the playbook

ABOUT THIS METHOD

The Collab Link Building method was developed by Syed Irfan Ajmal and executed by DMR.agency. It finds non-competing companies with overlapping audiences to create mutual-value partnerships generating referral traffic, brand authority, and high-quality backlinks.

Your 90-Day AI Campaign Brief

MEDIA TARGETING BRIEF

Client: FlowMetric (flowmetric.io)
Campaign Type: Trend Reaction
Beat: SaaS / AI / Enterprise Finance
Geography: United States
Date: July 2025

Targeting Overview

FlowMetric sits at the intersection of two high-velocity beats: enterprise AI adoption and CFO-suite tooling. The angle — AI-automated revenue forecasting for finance teams — maps cleanly onto the current editorial cycle around AI replacing legacy FP&A workflows. The selected journalists cover enterprise software, AI infrastructure, and venture-backed startups across top-tier tech and business outlets, making them the right audience to receive a trend-reaction pitch positioning FlowMetric as a credible voice on where AI-driven finance is heading.

The Tiered Media List

Tier A — Exclusive Window

- **Kyle Wiggers** — Deeply embedded in the AI/ML beat; consistently covers enterprise AI tools and funding rounds. Highest editorial alignment with FlowMetric's core story.
- **Jared Council** — Covers enterprise technology and AI adoption at the business-press level; ideal for a "CFO meets AI" framing.

Tier B — Embargo / Simultaneous

- **Stephanie Palazzolo** — Tracks SaaS metrics, venture financing, and growth-stage companies; strong fit for the data-driven forecasting angle.
- **Chris Metinko** — Covers startup fundraising and market trends; relevant if the pitch leans into FlowMetric's market traction or competitive positioning.

Tier C — Wider Release

- **Anna Googin** — Adjacent beat coverage; include in the broader wave with a tailored hook.
- **Kenrick Cai** — Despite scoring 88% in the initial fit model, his current beat skews toward fitness and sports coverage. Flag for verification before sending. If beat has shifted back toward tech/enterprise, elevate to Tier B.

Outreach Sequence

Phase 1 — Tier A Exclusive (Days 1–2)

Offer Kyle Wiggers or Jared Council a 48-hour exclusive on FlowMetric's trend commentary, including proprietary data or founder access. One journalist gets first right of refusal. If declined within 48 hours, move to the second Tier A name.

Phase 2 — Tier B Embargo (Days 3–5)

Extend an embargoed pitch to Palazzolo and Metinko simultaneously, with a coordinated lift date. Provide a distinct data point or customer proof point not included in the Tier A exclusive.

Phase 3 — Tier C Wide Release (Days 6–7)

Send the broader trend-reaction pitch to remaining targets and any supplemental list. No embargo; position as open commentary.

Follow-Up Cadence:

- First follow-up: 48 hours after initial send.
- Second follow-up: 5 business days later, reframed with a new hook or timely data point.
- No third follow-up. If no response, retire the contact for this campaign cycle.

Per-Journalist Angles

- **Kyle Wiggers:** Lead with the technical AI angle — how FlowMetric's models differ from generic forecasting tools and what that signals about vertical AI in finance.
- **Jared Council:** Frame around the enterprise buyer — why CFOs are moving from spreadsheets to AI-native forecasting and what FlowMetric sees in adoption data.
- **Stephanie Palazzolo:** Anchor on SaaS performance metrics — how AI forecasting changes the way boards and investors evaluate revenue predictability.
- **Chris Metinko:** Lean into market momentum — competitive landscape, traction milestones, and where FlowMetric fits in the broader FP&A automation wave.
- **Anna Googin:** General trend hook — the macro shift toward AI in back-office finance functions.
- **Kenrick Cai:** Hold until beat is verified. If confirmed tech-adjacent, use a founder-profile or company-narrative angle.

Verify Before You Send

Before any pitch leaves the queue, confirm the following for every journalist on the list:

- [] **Beat check:** Verify the journalist still actively covers SaaS, AI, or enterprise tech. Review their three most recent bylines.
- [] **Outlet check:** Confirm they are still at the publication listed in our database. Staff changes are frequent — check LinkedIn and the outlet's masthead.
- [] **Contact channel:** Validate the email address or preferred contact method. Do not rely on addresses older than 90 days without confirmation.
- [] **Kenrick Cai flag:** His current beat appears to be fitness/sports, not enterprise SaaS. Do not send until coverage alignment is re-confirmed.
- [] **PressIQ scoring:** Run each finalized pitch through PressIQ and log the relevance score. Do not send any pitch scoring below 70% fit without strategist approval.
